Small faults tend to be somewhat thicker than joints, which commonly are of hairline thickness. The trace geometry of a small fault is fairly straight when traversed along the direction of slip, but a wavy geometry is common in the direction perpendicular to slip (e.g., Aydin and Johnson, 1978; Power et al., 1987).

Contemporary architecture is the architecture of the 21st century. No single style is dominant; contemporary architects are working in several different styles, from postmodernism and high-tech architecture to highly conceptual and expressive forms and designs, resembling sculpture on an enormous scale. The different styles and approaches have in common the use of very advanced technology and ...
